

Programs.html Projects Addendum — Claude Optimized

DOORS2AI PROGRAMS.HTML — PROJECTS ADDENDUM (CLAUDE EXECUTION BRIEF)

PURPOSE

Add credibility by listing example projects students will build.
Content addition only. Do not modify layout, CSS, or structure.

NON-NEGOTIABLE RULES

- Do NOT change CSS
- Do NOT change class names
- Do NOT change IDs
- Do NOT change layout
- Only add text sections under each program
- Preserve existing sections

IMPLEMENTATION

FRONTEND PROGRAM

Add new subsection after "What you'll learn":

Section title:
Example projects you'll build

Intro line:
Students apply concepts by building practical projects such as:

Bullets:
Personal portfolio website
Responsive SaaS landing page
Interactive dashboard UI
Next.js project with routing and components

FULL STACK PROGRAM

Add new subsection after "What you'll learn":

Section title:
Example projects you'll build

Intro line:
Students apply concepts by building complete applications such as:

Bullets:
Full stack task manager app
Authentication enabled web application
REST API with database integration
Deployed full stack web app

AGENTIC AI PROGRAM

Add new subsection after "What you'll learn":

Section title:
Example AI systems you'll build

Intro line:
Students build practical AI applications such as:

Bullets:
LLM powered research assistant
RAG knowledge chatbot
LangGraph workflow automation
Multi-agent task coordinator
AI document analysis tool

CAPSTONE ADDITION

Add one line under capstone description:
Students design a complete system combining multiple concepts learned during the program.

VALIDATION CHECKLIST

- Only new text sections added
- No CSS modified
- No layout changes
- No classes changed
- No IDs changed
- Responsive behavior intact

FINAL INSTRUCTION

Add these sections exactly as described with content only changes.
